CONVERSATION

Date 2/6/08

RECORD 

PROJECT: CAHA ORV

Name: Kevin Noon, Cherry Green

Organization: NPS WRD, SE Region

Phone: conf

RE: need for wetlands or floodplains SOF/ issues and impacts related to these topics

Recorded by: NVD ( Nancy Van Dyke ); Lori Fox also on call

Kevin says maybe can avoid a SOF – see where parking and access ramps occur.

See where ordinary high water mark is- NWI maps are not complete – there are important seasonal wetlands in the dunal system

\*New facilities (parking lots, access) will require a SOF if in wetlands or possibly If **new** areas of beach are opened up to ORV; if just managing or improving existing access, will not need a SOF

DO include wetlands and floodplains as impact topics – address impacts

Adaptive mgt. – if new wetlands are created – will change over time, since is a barrier island

CONCLUSION – need more specifics before decide on SOF- new facilities in wetlands will require SOF

Check padre, Assateague, Fire island – see what they did

Multiple horizontal lines for additional notes or signatures.
