---

Now they are going to try and pit the disabled access people against the bird protection people.

Subject: Re: Access for handicapped

I hope some National Groups for Disabled will step up to the plate.

**Subject:** Access for handicapped

With the new attempt at a consent agreement and the questions posed by the Judge and the answers given by the NPS, what provisions are there as a result of the injunction request for the aged and handicapped? As I have stated at the Negotiation meetings, how can I, a retiree with a knee replacement get to the surf without truck transportation? In no way can I climb the dunes or walk the distance from the limited parking, if I can find a space. There is only one handicap ramp with limited parking spaces in all 70 or more miles, to a beach that is already crowded.. There will be no room to sit, let alone fish.

This is a selfish action based on poor science. We have repeatedly testified that the current procedures aren't working. Trying harder won't make them work. Last summer, approximately 30 Piping Plover and American Oyster Catcher nests were destroyed by one storm! None by ORV. The year before, half of the turtle nests

were lost due to storm and overwash. None by ORV. That's about 100 potential fledglings and 4,000 potential hatchlings. How will these proposed measures save these animals from extinction? We might consider asking God to save us as he did the Israelites as they crossed the Red Sea or Noah and the animals in the great flood.

We are also God's creatures, Americans, and nature lovers and intelligent beings. We have presented much information in the past to indicate possible methods of preserving the birds and turtles. Has anyone listened? Has the Park Service read, studied, and considered what we have submitted? It is approaching summer and I wish to enjoy the beach. It is my right! Am I being forced to leave the area?

Barbara Ackley
