I have been coming to Hatteras for 20 years now, bringing my children and now my grandson. He is 10 years old and has always wanted to be a park ranger. This year he has seen what the park service is doing with their signs and closures. He is also being told how you and your crew are killing the raccoons and foxes and other animals that you should be protecting. He cannot believe that this is being done for the sake of a few birds that will be drowned out anyway. The park service is supposed to protect and see to it that the tax paying citizen is enjoying our own land. Now maybe he will grow up to be a Doctor.
