Subject: Call from Sidney Maddox re North Ocracoke Winter Closures
Date: 07/21/2008 09:17 AM

Sidney called Friday PM and asked if we planned to have any winter closure for PIPL at North Ocracoke. He indicated that there was some excellent low energy areas on the north end (north of the ramp near where the PIPL prenesting closure) that would not affect access and since apparently we (or he) have seen a number of migratory and/or wintering birds there, it would be a good location for a wintering buffer. I told him we would look at it and let him know the disposition.
