Mike..

I feel that the Key spot on Ocracoke would be South Point which should be no surprise ... Most of our fall fishing is done between Ramp 70- South Point area. I don't see any problems we should have if this area is open. From the looks of today patrol the chick can't be found so we should be able to make the community and Park Visitors happy soon. There is little but some fishing at the north end but more to the south point area.

Thanks

Kenny
