Mike-

I thought the emails below may be pertinent to this morning's conference call. I sent a copy via email of the turtle protocols to Brenda Graff. She requested a paper copy but all I had was the PDF version of the protocols which I had already emailed to her. Looks like the USGS Library hasn't even catalogued the protocols.

Dear Britta,

Thank you very much for sending me the PDF copy which I have passed along to the original requestor. Is there any way for me to get a paper copy of the report so we can catalog it.? I did not find the report listed anywhere in the USGS website, google.com or a worldwide library catalog so it is not been widely distributed and is very hard to get hold of. If we catalog the paper copy, then people will know where to get a copy instead of guessing maybe the USGS, the NPS, or VPI. Thanks for all the help so far.

Sincerely,
Brenda Graff

nesting sea turtles report Subject

I had a request from the public for a report that is on the Cape Hatteras National Seashore area. Before I try contacting one of the USGS biology science centers, I wanted to see if you had a copy yourself since one was never deposited in the USGS library system. I already checked the online catalog for the NPS libraries but didn't see anything listed there. If you don't have a copy, can you suggest any other places to search? Thanks for the help.

UNITED STATES GEOLOGICAL SURVEY, MANAGEMENT AND PROTECTION PROTOCOLS FOR NESTING SEATURTLES AT CAPE HATTERAS NATIONAL SEASHORE, NORTH CAROLINA (2005).
