Bob,

I had already asked staff to pull together some information like this, so we can see how many nests occur in ORV areas vs. non-ORV areas. Will share the information when it is available.

Good Morning Mike,

Would it be possible to have a listing of turtle nest for 2007 showing where the nest were. This seems pretty simple to me. My interest is was the beach village, resource closed, open to ORV, Open to Predestrian at the time of the nest being laid.

I know you are busy but my perspective on this is that we are going to close and discriminate against one user group for a pretty rare event occurence in the seashore. One turtle nest on average per night for 70 miles of beach is a rare event.

Anyway, thanks,

0022287

Bob Eakes

PS I am not saying we should do nothing but simply trying to understand the issue.
