Thanks, Mike (B).

Mike (M)--

In case you're asked, the reviewers are as follows:

1. Tim Pinion, I'm assuming you know...
2. Dr. Bob Woodman is the ecologist for the Gulf Coast Network. He was a former USGS research biologist with the MACA prototype. We selected him so that we could have a good review of the statistics in addition to the biology.
3. Patty Kelly, if you haven't run across her before, is the shorebird biologist out of the Panama City Field Office. I wanted to get an external reviewer who wasn't directly connected to the issues at CAHA but knew enough about the issues to provide good input.

Joe.

Subject shorebird protocol review

Hello All -

I appreciate your willingness to provide review of our shorebird monitoring protocol. Comments should be provided to me by 10 March. The document is located on our FTP site on the following path: SER-IM/SECN/ShorebirdProtocol/. A copy of our pilot-year

implementation summary report is also included in this folder, as it is referred to frequently in the protocol and may be useful for reference. The FTP site information is:

Public FTP Site address: ftp://63.220.43.40
Username: npsftpwin
Password (case-sensitive): FTP04npswin
Please note: it is a zero, not an 'O'.

Thank you again for taking the time to provide input. Please feel free to contact me if you have any questions, or trouble downloading the documents.

Sincerely,

Mike Byrne.
