Mike :

After conversation with my other two Law Enforcement Rangers this is what we came up with.

Option A would be my choice:

Reasons :

1. Park Visitors and local community want to be able to have this experience. They would have the option to go out and have a fire at least sometime during the evening rather than not at all.
2. The Law Enforcement Ranges would be able to remind park visitors that the fires needed to be out by midnight.
3. This seem to work very well for the Ocracoke District when we were under the 10pm off the beach

I really don't feel we need to go at this time with a Educational Permit for beach fires.

Hope this will help

Kenny
