Doug,

I'm sure you are busy this week. Want to remind you that you were going to pull together a list of the kinds of data we collect on breeding birds, so I can identify those items in the revised Resource Protection Table (now calling it the Species Management Table). If we are simply going to continue collecting the same data we've been collecting, then maybe all you need to do is email or fax me a copy of the field data sheets and I can get the information from that.

(Purpose: Since Walker recommended that we collect whatever data that USGS recommended we collect and our proposed draft table is nonspecific about it, the purpose of listing the data is to give people a chance to comment in the DEIS about the details (especially if what we collect is a little different than what USGS recommended)

Thanks,

Mike Murray
