Dear Mike,

Just wanted to voice my opinion here on this beach closing ordeal.

Cape point is one of the hottest fishing spot in the world. Closing this area to the public would be a huge mistake. These enviro wacko's have no interest here and I believe this whole thing is not even about wildlife. Not quite sure what their real agenda is but there is some other agenda.

Please leave the beaches alone, the vehicle traffic hurts nothing and the whole system was doing just fine before these liberal idiots started this mess. It is accomplishing nothing and can only hurt the local economy.

Thanks,
Lee Cortese
