Paul and Mike,

Thank you for the heads up on the dog on leash requirements and enhanced enforcement for non - compliance. No complaints from me on this issue.

There may be a need for an additional public release on dogs in the water - ocean side and sound side.

We and many of the visitors know that dogs in the water oceanside are in state waters and may be off the leash, but BEFORE the dog is released to fetch a ball, stick, etc. it must be in the water and the same applies tyhat the dog must be re-attached to the leash coming out of the water.

Soundside enforcement is within 150 feet of the shore the dogs must b e leashed.

Your thoughts on my correctness and the need for an addendum to your public release.

Frank Folb
