Subject: RE: ORV passengers

Hello,

Yes, I have the overall totals for Easter weekend at the ramps we counted. Total, we had 105 vehicles and 231 passengers (which includes the driver). Please let me know if you have any further questions.

Brian

Hi Nancy,

I got your phone call. I have to be on another call in a few minutes, then I am driving to Charlotte and will be out of the office the rest of today (but back tomorrow). I attached the pretest report from the counting we did back in October. Exhibits 2.1 and 2.2 summarize the number of vehicles counted and the number of passengers (as best they could tell). With these few observations, it looks like it is closer to 2 people per vehicle.

Brian -- do you have the data on vehicles and passengers from last weekend that you could send Nancy? Just the totals are fine -- we need average people per vehicle.

Thanks,
Carol
