I had some problems getting the pictures loaded onto the shareall today so I wanted to send these links out in case anyone needed these pictures beforehand. If you have any problems or questions regarding these photographs let me know. After they are all transferred to the shareall these links will no longer be valid and the pictures will be located in the Resource Management folder. You can right-click on the photo and Save Picture As to whatever folder/drive you would like.

Bodie Island - Coquina Beach to Oregon Inlet
