Good morning,

I would like to protest the assumption made that a dead AMOY on Oregon Inlet bridge was hit by a vehicle. Similiar to last year's AMOY which was again presumed to be hit by a vehicle there is simply no proof.

I would suspect that both AMOY's were found by biased NPS personnel and placed where the assumption casts the customers of NPS in a bad light. My assumption is just as misplaced as yours but the difference is that I don't put them in print for all to read.

You need to give your bias a rest.
