Pete,

See attached FYI. Sounds like there will be no furtherance of discussion about a light management ordinance. Based on where discussion between FWS and WRC was left on a "joint" night driving proposal during the RegNeg process, do you think it is possible and realistic at this point for FWS and WRC to resume trying to develop a joint night driving recommendation, or would it be better to issue the NPS alternatives (including a new one that was shaped, in part, from that discussion) and see where the public and agency comments lead us?
