That is the first I have ever heard of a deal cut with developers. That's just another rumour. When I first arrived here in the late 1980's into the early 1990's, the beaches were open to ORV's between Frisco and Hatteras. They were closed due to erosion/narrow beaches in the mid 1990's. The beach has built back up in some places and the beaches could have been opened up, just never were. David Carter probably has some institutional memory about this, as well.

Subject Fw: Seasonally Designated BUT Permanently Closed to
ORV Beaches

See highlighted sections of Bob's message below. Are either of you aware of any such "deal" (whether formal or informal) being made by a previous Superintendent? **Cyndy**, is there any chance of correspondence from the late 1990's or early 2000's related to this?

Subject Re: Seasonally Designated BUT Permanently Closed to ORV Beaches

Dear Mike : I was disappointed by your response to Ted Hamilton regarding the continued closure of Hatteras and Frisco beaches. In the argument against setting a new precedent you ignored the earlier history of open beaches which lasted considerably longer than the current closures. You should be reminded that it is unlawful to privatize a public beach in this manner. The major reason that congress established this National Seashore (which you administer) was to provide access to all the public instead of just a few privileged and greedy people. For several years there has been a persitent **rumor that the NPS had cut a deal with developers**

in these villages to keep the beaches private. This may have been prior to your arrival. I have yet to see any real evidence of such a deal but having survived REG-NEG not much surprizes me anymore. I need to ask for the record

: " Was such a deal ever made by direct offer or by inference by any member

of the Park Service ? " REGARDS : BOB---- Original
