Subject Re: TCP letter for CACH 

Doug,

Attached is the letter (short and sweet version). Michael and I worked on it and we decided to insert the one sentence he crafted as highlighted below:

We have completed a number of studies meant to identify historic resources, including an historic resource study and an ethnographic overview and assessment. Mostly as a result of NPS efforts, the Outer Banks now have  ?  individual sites and  ?  districts listed on the National Register. In addition, we are currently seeking funding to update our historic resources study, since we recognize that a number of properties may have attained historical significance in recent years. We welcome your input when that project gets underway. **At this point in time, we have been unable to determine whether there are Outer Banks communities that have cultural practices and beliefs associated with the specific beaches in question. Also, we do not have sufficient information that shows that the association between any community's cultural practices and beliefs about specific beaches are integral to the continuing cultural identity of that community.**

**Be sure to fill in the blanks about sites and districts.**

Michael and Allison

Thank you for your time spent on this issue, I know that the Superintendent would like to get a letter out soon, but agrees that we want this to be a right. If you want me to set up a conf call with Superintendent, Michael, Allison, we can give you our recent discussing with SHPO on this issue?

 Subject TCP letter for CACH

Dear Michael,

I think you must be on travel but just a quick note to ask when you think you could finish the TCP letter for CACH. Doug called me today and asked - I think the superintendent wanted to try and get the response out next week.

I might be in tomorrow - not sure - but will be on Tuesday.

Hope all is well with you and thanks as always for helping out!

Allison
