Lori - so sorry I forgot to add this source. This is the source of the auto levels for 15 and 25 mph. Actually, you need this spreadsheet anyway for the admin record. A citation should be inserted in Tables 1 and 2 and also added to the references page. Would you mind doing that for me?

Thanks,
 Dayna

Hi Dayna,

For the administrative record, please find information below on the vehicle spectral levels used for modeling predictions. The data are REMEL (Reference Energy Mean Emission Levels) from U.S. DOT.

TNM REMEL - Auto and Motorcycle spectra at 15, 25, and 55 mph at 50 ft

Hi Randy

The spreadsheet has been updated to include TNM automobile spectra for 15 and 25 mph. Per your conversation with Judy, also included are the TNM motorcycle spectra for 15, 25, and 55 mph.

We do not have any data for ATVs.

Hope this helps.

Cynda

Hi Cyndy, Hi Amanda,

Thanks to both of you for your help with this! Frank and I really appreciate it.

If there is any chance on Monday you can send us one-third octave spectra specific for autos at 15 mph and 25 mph, that would be great!

I understand that this data might be in your archives, but if you can get it without too much trouble, we would be very grateful.

Thanks again!

Randy

P.S. You don't happen to have any spectral data for ATVs, do you?

Hi Randy,

Here it is. Have a good weekend.

Cyndy
