---

Tim Pinion was the source of this comment. He was able to get nothing solid from Va Game and Fish. I suggest that the Source/Comment box read as follows:

**Average depredation rates over last 5 years, nests=31.2%, chicks=51.4% (CAHA AMOY Report for 2008-09 in preparation). The DFC is to reduce depredation rates while recognizing some depredation will continue to occur.**

Use your "artist license" to change as you see fit. If you have questions, call me. The AMOY Report will be available sometime in the next several weeks, but I don't know if it will come out before or after the DEIS.

Subject Fw: Loose Ends - ORV Plan Chapter 1

Thayer

Please see if you and Doug McGee can resolve this (i.e., respond with how to resolve it, etc). I will not be able to get to it until Thursday.

Thanks

**Subject:** Loose Ends - ORV Plan Chapter 1

Hi Sandy and Mike,

Please see the attached page from chapter 1. In the AMOY DFC table, we still have a note that you are checking with VA DGIF about predator control efforts and corresponding shorebird success rates. Is there updated text for that box?

There may be a few more of these questions for you today and tomorrow as we clean this up, but it should be minimal.

Thanks,  
Lori
