Subject Re: Coyote on Hatteras Island 

Just 100 yards West of R45, by the old campground drain, on the north side ~50 yards of the primary dunes. This is very close to the pipl areas, we have pipl around salt pond road and sometimes they are seen near R45.

How far from the "nesting area" or any more details on exactly where you got it?

Subject Coyote on Hatteras Island

We captured a female Coyote today from the Cape Point Nesting area. I believe it is a juvenile and has never been bred. This is now the first confirmed case of a Coyote on Hatteras Island. I believe that this is not the only Coyote on Hatteras Island. Only time will tell. I believe that the animals are coming over the Bonner bridge on there own. I have attached two pictures. Thanks let me know what you guys think.
