Carol, this type of action is not productive and doesn't do anything to make sure that the outcome of this mess is fair, scientifically-based, and doesn't cause even more undo harm to the island businesses. Unfortunately, actions like this are fodder for the other side to use to try to paint a dark picture of the islanders and the businesses there. NPS employees are not to blame for this and right now the residents and businesses need every friend they can muster, both inside and outside the agency. I don't know you but have heard that you are an astute business woman so I'm sure that you know that anything that happens in any business on the island, reflects on all - now as never before, that reflection needs to be positive.
