**Subject:** TOTAL Pre-nesting closure acreage  
**Date:** 02/23/2010 04:29 PM

---

Larry,

Here is the information you requested. Note: Acreages were determined by GIS. The acreages reflect the *TOTAL* closure area, not just the beach area(s) closed. As indicated by the maps, some of the acreage is dune and/or vegetated area that would not be open to ORV use under current management policy, even if it were not encompassed within a pre-nesting area.

<u>Location</u>	<u>Acres</u>	<u>Comments</u>
Bodie Island Spit	159.10	Closed to All Entry
Bodie Island Spit	1.01	Open to Pedestrians Only
Cape Point	320.11	Closed to All Entry
South Beach	122.09	Closed to All Entry
Hatteras Spit Overwash Fans	72.52	Closed to All Entry
Hatteras Inlet	34.83	Closed to All Entry
North Ocracoke	96.20	Closed to All Entry
North Ocracoke	12.74	Open to Pedestrians Only
South Point	<u>577.70</u>	Closed to All Entry
TOTAL	1396.30	Includes Pedestrian Only Areas

Subject Pre-nesting closures

Cyndy,

How many acres are included at each site of the proposed closures?

Thank you,  
 Larry
