Mike,

It was nice to speak with you this morning. As we discussed, it looks like the USGS EPN folks will have this published very soon. We will let you know as soon as this happens. Dr. John French has been the main Point of Contact (301-497-5702; jbfrench@usgs.gov) here at PWRC.

Dave and John,

Mike, the CAHA Superintendent, said he expects some media inquiries and we might expect some as well. There may be a question at some point that relates to additional reviews required of our report. Mike and I discussed the context.

I think it is important that people who question additional reviews understand that the original, peer reviewed reports were not changed or re-reviewed, but were integrated into a single comprehensive report with an introduction and summary that were reviewed to ensure they accurately reflect the content on the comprehensive report.

AB, are able to work with John on the message for possible media inquiries.

Thanks,

Greg
