Mike -

Please do feel free to call me, and I will help if I can. Sorry to be slow in reply to your email; I am just back after a week out of the office. I realize you are getting a lot of questions and there is a need to respond.

I have been working the last couple of days with AB Wade in our Communication Office, who I hear has been in contact with Cyndy Holda in your office. We are putting together a statement to be used in response to questions to USGS, so that we are all on the same page. As Greg Smith noted, the final formatting etc., for the report is still in progress, and we hope to have that all done and up on the web very soon. Nobody is looking forward to that event more than me....except perhaps you.

John French

Open File report

Mike,

It was nice to speak with you this morning. As we discussed, it looks like the USGS EPN folks will have this published very soon. We will let you know as soon as this happens. Dr. John French has been the main Point of Contact (301-497-5702; jbfrench@usgs.gov) here at PWRC.

Dave and John,

Mike, the CAHA Superintendent, said he expects some media inquiries and we might expect some as well. There may be a question at some point that relates to additional reviews required of our report. Mike and I discussed the context.

I think it is important that people who question additional reviews understand that the original, peer reviewed reports were not changed or re-reviewed, but were integrated into a single comprehensive report with an introduction and summary that were reviewed to ensure they accurately reflect the content on the comprehensive report.

AB, are able to work with John on the message for possible media inquiries.

Thanks,

Greg

Information Request Re: DEIS

Sherri/Sandy:

Received a call from Mike Donaldson today. He said he was "just a concerned citizen requesting information on how to obtain a copy of the document that no one seems to know how to get their hands on." Said he had "called USGS by phone and googled their website for the information to no avail." Said he feels "it is unfair to cite a document over 50 times in

your DEIS but yet the general public doesn't seem to be able to obtain a copy of the document to read for ourselves what those recommendations are" and he feels "this will have a large bearing on the validity and outcome of your DEIS."

The document in question is: Recommendations of Management of Endangered Species at Cape Hatteras National Seashore, USGS- 2009-1262

Mr. Donaldson gave me his phone number and email address and I advised I would look into the matter and get back to him.

Any suggestions?
