education is the only way to keep everyone happy. One way would be to have all residence and visitors to take a short seminar to learn how to drive on the beach, to understand wildlife, to participate in planting and protecting the dunes and beach. All local tax paying residents will receive a decal for free to attend the educational seminar and all non-residents will pay an annual charge for the decal and taking the seminar for this privilege to drive on the beach. thru this educational process the residence and tourist/visitors will have a better understanding and an appreciation for the people that live here and what the island is all about. the revenue from the seminar and with back of the room sales will build great goodwill and offer greater business for all with the kind of harmony and welcoming smile the island once had. do you need a marketing plan? Do You Know What I Am Talking About. Aloha . the meaning of aloha is affection, love,peace and compassion an island blessing with respect. If Hatteras would create this feeling again this will create the respect for the beach that it once had. aloha Clifton Williams
p.s. please contact me if you need any advise on this concept it is easier than you think simplify.
