Subject: USFWS Verbal Approval for Proposed Electric Predator Fencing for CWB at Bodie Island
Date: 03/24/2010 09:43 AM

I followed up with Pete Benjamin via telephone regarding FWS comments/approval of the subject proposal. Pete said they were fine with it and that we could proceed from their perspective. His only question was regarding monitoring of results/effects and I answered his question to his satisfaction. Pete indicated that he was still working on the letter to Mike on this and other subjects, but there would be nothing in the letter to prevent us from implementing the project at this time.

Tyler should contact Meghan to make sure the PEPC documentation is complete and go ahead with implementation. Britta/Tyler should provide a schedule for implementation and make sure the area is mapped via GIS when implemented.
Thanks.
