I agree and won't burden them with this now. I have asked Britta to provide the operational and procedural issues (and potential tweaks to the preferred alternative) that you wrote up to the GS-7 leads and to collaborate with them on best approaches so that she and I will be prepared for the June 10-11 meeting, but the specific response to public comments can wait until sometime after the June 10-11 meeting.

Thayer,

See below FYI. Please review the attachment and decide if it would be worthwhile to forward to your staff now or later. My inclination would be to wait, since it is a large amount of information to consider at a time when they are very busy with field operations. The intent of the June 10-11 meeting, and the preceding discussions with staff in order to prepare for the June 10-11 meeting, is to focus specifically on possible operational or procedural changes in the proposed action; it is not to attempt to respond to all the public comments - that work will come later and be based on the attached report.

Note: I modified the attachment slightly by adding page numbers. Attached is the version with page numbers.

Subject CAHA ORV Plan/EIS Concern Statement Report

Sandy, Doug and Mike

Attached is the preliminary draft concern statement report. We will be forwarding you the entire report this afternoon, but I wanted you to have the heart of it as soon as possible this morning to allow for maximum review time. This is a draft that is going to the editor so the concern statements will be further reviewed for editing and grammar. I also think there are opportunities to consolidate some of these on the next draft.

Please let me know if you have any questions and expect the full report today.

Take care,

Lori
