Mike,

I hope you are having a great Memorial Day weekend with some time with your family. I will call you tomorrow to express my frustration about a meeting with the new Regional Director. I was not given any invitation to attend and could not do it on such short notice even if I had been invited. I think it is short sighted to leave out the non resident property owners from having input to the new Regional Director.

This year is strongest rental year for us in the last 12 years as it is for all the homes that I track and have weekly information on. I think our perspective is needed and necessary for the Park Service in its deliberations about the final regulation. The issues of user conflict and providing for the safety of the visitor are not getting the proper attention. The voices of those who own the properties which are the true economic engine of Dare County need to have a chance to be heard. Is there any chance I could participate via phone during the environmental group meeting? Is there any chance for a separate meeting with the non resident property owners?

Thanks again for your dedicated service and hard work these past few very trying years.

Jeff Wells
