No sir.

There is a short spot about 2/10th of a mile south of Ramp 4, but you access the area using Ramp 4.

If you have any questions, please contact me.

Very Respectfully,

Thanks Mike.

Quick question. I see that 661 vehicles were counted at Ramp 4. According to access reports, the majority of Bodie Island Spit south of Ramp 4 was closed that day. Does that mean that all those vehicles were north of Ramp 4?

Thanks.

National Seashore Beach  
Subject Access Report for June 3,  
2010

Thanks Cyndy. I believe this dataset was provided to RTI recently for inclusion in the draft EIS. I would hope there wouldn't be too much digging involved.

Thanks.

Fw: Cape Hatteras National  
Seashore Beach Access Report  
Subject for June 3, 2010

Michael,  
Doug Wetmore works with NPS out of our Denver offices.  
Can you provide the information he is requesting? This may take some digging back into 2008 files.....but there may be some information. Talk to Paul and Jon Anglin about this. Bob

Trick would've been the pilot at that time I believe.

Please provide any information you have to Doug Wetmore and copy me.  
Thank you!

Re: Cape Hatteras  
National Seashore Beach  
Subject Access Report for June 3,  
2010

Hi Cyndy.

I'm trying to verify the pie charts on page 265 of the DEIS which indicated aerial counts at the Seashore on July 4, 2008. The beach access report indicates that Cape Point, South Point, and Bodie Island Spit were closed to ORV that day, but the pie charts indicate that vehicles were concentrated in those areas on that date.

Could you send me the aerial count data for the July 4, 2008 flyover?
