See below. Are you available to talk to Spence tomorrow? Also, I'm copying Mike in case he wants to be involved at this point in time. Please give me times tomorrow or Thursday when we can do this. I am tied up from 10-10:40 and 2-2:45 tomorrow. Call me tomorrow AM early or e-mail me so I can get it set up.

Subject Response to ORV EIS public comments

Hi Thayer,

In making my way through the concern statements/comments regarding sea turtles I have some questions that I would like to get some input on from you all. I am still trying to flesh out my thoughts on some of these things and read the Hardham/Davis position paper – so I am not quite ready to talk today, but wanted to give you a heads up because I know you guys are busy. Is it possible to have a discussion tomorrow? I am assuming that Michelle is probably the person I need to speak with most. While talking tomorrow would be preferable, if that does not work for you all, could we then talk on Thursday?

Comments I would like to discuss:

- Use of red coverings over headlights for night driving;
- Findings of major adverse impacts to turtles with regards to night driving;
- Discussions of the Larry Hardham and Robert Davis position paper;
- Carsonite vs wooden posts – comments suggest carsonite posts influenced false crawls.

I am around all day tomorrow and Thursday and can adjust my schedule to whatever time works best for you all to talk.

0026871

As an additional heads up, I believe Richard Podolsky will be touching base with you at some point this week as well to get some input on comments relating to birds.

Regards,
Spence
