Darrell,

See attached information for project planning purposes. **YELLOW** highlighted items are priority needs to ensure initial successful implementation of the ORV plan. Other items that are not highlighted are needed to ensure fully successful implementation of the plan in the long-run. This updated list is no doubt different than the list that Dennis based his previous estimate on. Some of the YELLOW items would require little in the way of construction, so construction cost for those items is not a hurdle, but those items would need compliance before implementation.
