Lori-
Here's the additional info you requested. I hate to point out my mistakes but South Point only hatched 8 chicks and lost 8 chicks (not 10) so the total lost is 18 (not 20).

Location	# Breeding Pairs	# Nests	# Nests Hatched	# Nests Lost	Total Eggs	Total Hatched	# Chicks Fledged	# Chicks Lost
Bodie Island Spit	0	0	0	0	0	0	0	0
Cape Point	6	6	6	0	24	21	15	6
South Beach	1	1	1	0	3	1	0	1
Hatteras Inlet Spit	0	0	0	0	0	0	0	0
Ocracoke (North)	1	1	1	0	3	3	0	3
South Point	4	7	3	4	22	8	0	8
Total:	12	15	11	4	52	33	15	18

Forgot to add, we also need total number of eggs, in addition to the number of eggs hatched.

Sandy-
Use the following revised table (instead of the table in the weekly report that Mike provided to you) for PIPLs.

Chicks	Location	# Breeding Pairs	# Nests	# Nests Hatched	# Nests Lost	# Chicks Fledged	# Chicks Lost
--------	----------	------------------	---------	-----------------	--------------	------------------	---------------

Lost							
0	Bodie Island	0	0	0	0	0	
	Spit						
6	Cape Point	6	6	6	0	15	
1	South Beach	1	1	1	0	0	
0	Hatteras Inlet	0	0	0	0	0	
	Spit						
3	Ocracoke	1	1	1	0	0	
	(North)						
10	South Point	4	7	3	4	0	
20	Total:	12	15	11	4	15	

Here is the info needed to update the AMOY tables that we discussed earlier today.

(Embedded image moved to file: pic21926.jpg)

(Embedded image moved to file: pic05906.jpg)

I should have total nest numbers for CWBs to you by early next week.

I should be in the office for most of the day tomorrow if you have any questions for me. We should be able to pull together totals for our colonial waterbirds by next week (midweek) if we make it a priority. Is that soon enough for you?

Thanks, Mike.

We'll cite this week's res mgmt report for AMOY and PIPL and rely on your and Britta's advice on how to handle CWB and turtles.

Sandy,

The available data has generally been included in the weekly Resource Management reports. PIPL and AMOY are done for the season. Turtles are still nesting. CWB nest totals for the season are not yet available.

It is okay to contact Britta to see when CWB data might be available, but we want to be sure the data is accurate before releasing it.

Hi Mike,

We would like to update the information in the DEIS for shorebirds and sea turtles with the 2010 breeding season data, current as of now, for the first internal review draft FEIS. I realize that turtle season is still ongoing and perhaps also some of the CWB. We'd like to include the data you do have to date, and will cite it as personal communication with Britta or however the park thinks is most appropriate. After that, unless something really startling occurs, we will not continue to update.

I'll give you a call to discuss what you think is possible for the park to provide in a bit. Thanks, Mike.
