Subject: update - 2010 PIPL numbers for NC
Date: 09/17/2010 06:54 AM

Hello All:

I've been working to get numbers from all who recorded data on breeding season Piping Plovers in NC, and everyone has been super cooperative and nice. However, I still have a few blanks in the data due to most USFWS biologists being deployed to the Gulf, many people having to do a bit of mop up after Hurricane Earl, and a couple personnel changes. Therefore, I still have a few days to go before the data will be complete and checked for accuracy.

I apologize for not having the data as quickly as you need them, but will provide them very soon.

Best regards,
Sara Schweitzer

Hi Lori --

On August 19, I sent my request for the 2010 update to the State coordinators with a requested reply date of October 29 (it has been my habit for many years to request responses on Halloween or the Friday before).

It's possible that Sara Schweitzer with NCWRC will be able provide you with an earlier update, but like many of her counterparts, she may be buried in other work and anticipating having several more months to review and quality control her data.

Subject RE: 2010 PIPL numbers for NC?

Hi Anne,

From your voice mail, looks like you are out of the office and likely quite busy! When you have a chance, I was wondering if you had (or know who I could contact) the preliminary count for number of breeding pairs in NC for 2010?

Take care,
Lori

Hi Anne,

I just wanted to let you know that we've asked Lori Fox from Louis Berger (our NEPA contractor for the Cape Hatteras National Seashore Off-Road Vehicle Management Plan / EIS) to contact you about numbers of PIPL breeding pairs for 2010 for North Carolina. They're working on updating numbers for the FEIS. Thank for your continuing help!
