The proposed edits seem good to me. I think that better captures the situation under the interim strategy.

Subject: replacement text for "the entire Seashore"

Hi Mike,

I think the draft replacement text for "the entire seashore" that's in the 2nd internal review draft ("on the ocean and inlet shoreline and existing soundside routes that are designated as ORV routes") is still ambiguous and confusing.

Is this is a better replacement: "on all the ocean and inlet shoreline and on the exiting soundside routes."

as in the sentence under Wetlands, Impacts of Alternative A (text italicized)

Under this alternative, visitors would be allowed to operate ORVs *on all the ocean and inlet shoreline and on exisiting soundside routes*, 24 hours per day year-round, subject to temporary resource closures, seasonal ORV closures in front of the villages, and temporary ORV safety closures (see figure 2, chapter 2, Alternative A and B maps).

For right now, I'm just flagging the spots in CH 3 and 4 where the draft replacement text is, without changing it, until we can discuss. Thanks.
