Dear Mike : The last storms have left the interdunal roads and many ramp approaches in a mess with deep holes and standing water. Pole road below Ramp 55 is very bad and needs grading. Erosion of the front beach is so severe that Pole road must be used to access Hatteras Inlet. This lack of maintenance reflects poorly on the NPS ability to care for its resources. CHAC has their surf fishing tournament scheduled for Nov 3 when many out of state visitors will need to use these roads for access to the beaches. Hopefully they can leave with a good impression of NPS stewardship. Thank You, BOB
