Mary Helen,

Your understanding is correct. An explanation of the 75 meter buffer for breeding/nesting piping plovers is found on p. 72 (last paragraph) of the FEIS.

Hi Mike --

My copy of the consent decree establishes a 50-meter buffer for breeding/nesting piping plover.
The FEIS sets 75 meters. Just want to make sure that this is an increase from the consent decree and that I didn't miss a change somewhere.

Mary Helen
