Mike

Congratulations on protecting endangered turtles and plovers and not worrying about the PEOPLE who pay your salary. The reality is the turtles and birds did just fine before you showed up.

Also thank you for ensuring that I will never again be able to go fishing with my grandson at our favorite place on earth - Hatteras Inlet.

The harm you have done to countless people can never can never be repaired. You alone could have stood up for what is right. Apparently you were too worried about your job. You are a disgrace and for the good of the seashore you should immediately resign your position.

Respectfully

Rick Raszkowski
