Dear Director Jarvis,

While I understand your support of everything which NPS has done please do not ask me to support that which has caused my neighbors and I so much needless hardship. The promises made of balancing the needs of resource management and access by the American public are simply false.

To ignore traditions, history, Hatteras Island economy, enabling legislation, for no other reason than to placate the chosen special few is ridiculous. Three years of the consent decree and nothing positive to be shown is what this is about. While you insult me with ORV language the reality is pedestrians and all are being thrown off this beach to give special interest groups what they want.

Finally, Mike Murray's extension is 150 and Cyndy Holda's is 148. Thanks for the insult.

Sincerely yours,

Bob Eakes
