Subject: Cape Hatteras ORV regulation -- follow up to my phone call

Nathan –

Re: Cape Hatteras ORV rule – 1024-AD85

We need two things from you, please:

- A change to the ROCIS listing for this rule to show a court deadline of November 15, 2011, for publication of the final rule
- Expeditious review of the proposed rule

I have discussed with you previously the need for expeditious review of this rule. The court deadline of November for publication of the final rule means that we need to move as quickly as possible to publish the proposed rule. (Note that the deadline was extended from an original deadline of April.) While the rule is controversial, it is not lengthy. Further, you received on March 14 the one-page briefing paper you requested that gives the background of the rule and the issues involved.

Please note that, due to an NPS oversight in preparing the semiannual agenda, the rule is not listed as having a court deadline. Could you please revise the listing to show that there is a court deadline of November 15 for publication of the final rule?

Thank you.

John

PS – Here is a link to the article about the rule and associated delays that appeared in a local paper. I hope we can turn this perception around by acting quickly.
