Kenny,

See attached map of proposed parking areas near Barrow Pit Road. Please take a look at the two proposed areas again in the field and make a recommendation which of the two options is preferred, based on most beneficial and safe for access (e.g., which has most room for parking spaces off the highway or is a safer location?) and least environmental impacts (e.g., which has the least vegetation impacts or the more feasible dune crossing for pedestrian access?). Also, please advise if the preferred option would need a boardwalk over the dune (if there is room for one between the highway and the dune) or would a trail be sufficient.

Since the map file is large, please "**Reply without Attachment(s)**" by Monday, June 27 to let me know what you recommend.
