Doug:

I thought I understood from our conversation, that once the comments were entered into PEPC the program had the capability to screen for anything inappropriate, so I was waiting to hear back from you. Perhaps you can check with Matt and/or Julie to see what can be done. It will be extremely time consuming to read through the comments that are pending post, now at 14,000+.

In the meantime, I'll converse with DOI Exec Sec to hear their thoughts and catch back up with you.
