Hello Mike,

I again take great exception to Cyndy Holda rubbing our faces in the pile of manure you and NPS have created here on Hatteras Island. Her quote at the end of her press release about the Wright Memorial Extravaganza sort of takes it in"

"About the National Park Service. More than 20,000 National Park Service employees care for America's 395 national parks and work with communities across the nation to help preserve local history and create close-to-home recreational opportunities. Learn more at www.nps.gov."

You have to be kidding. After NPS has completely ignored all of it's mandates and promises to us on Hatteras Island she has to grind home her bullshit lying philosophy and personal agenda is just beyond insult.

Thank goodness you all live north of the bridge so you don't have to visit Hatteras Island and the economic harm you have done. Sleep well knowing that most of us who have not gone bankrupt are on our last financial reserves.

Merry Christmas,

Bob Eakes
