

the city of Carlsbad in San Diego County, California. EPA reviewed applicability for the criteria pollutants expected to be affected by the modification, including nitrogen oxides, carbon monoxide, particulates, volatile organic compounds, and sulfur oxides.

SUPPLEMENTARY INFORMATION: The Carlsbad Energy Center Project is a proposed 540 MW net (558 MW gross) combined cycle natural gas-fired power plant that will be built at the existing Encina Power Station in the city of Carlsbad in San Diego County, California. The Carlsbad Energy Center Project will replace three of five existing natural gas-fired boilers located at the eastern end of the property site at the Encina Power Station. The Encina Power Station is owned by NRG Energy, Inc. (NRG), and currently has a total of five natural gas-fired boilers, which are allowed to use No. 6 fuel oil during curtailments, and three fuel oil storage tanks. The Encina Power Station is an existing major source, and the addition of the Carlsbad Energy Center Project would be physical change to the facility.

EPA Region 9 has authority to implement the Clean Air Act Prevention of Significant Deterioration Program at 40 CFR section 52.21 for San Diego County, California. Because the Carlsbad Energy Center Project is a physical change to an existing major stationary source, EPA Region 9 evaluated whether the physical change is a major modification by determining whether the physical change will result in a net emission increase for pollutants regulated under the PSD permit program. We received emissions information from NRG on June 5, 2009, as well as additional information since that time. This emissions information addressed the following criteria pollutants associated with the modification: Nitrogen oxides, carbon

monoxide, particulates, volatile organic compounds, and sulfur oxides. Based on our review, we have determined that the Carlsbad Energy Center Project will not cause or result in a significant net emissions increase for these pollutants, and will, therefore, not be subject to the PSD permit requirements.

If available, judicial review of EPA's determination may be sought by filing a petition for review pursuant to section 307(b)(1) of the CAA in the United States Court of Appeals for the Ninth Circuit within 60 days from the date on which this notice is published in the **Federal Register**.

Dated: November 9, 2010.

Notice

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public.
