Buxton, NC 27290

Application for Proposed Alternate in Negotiated Rulemaking Process

I am applying to be an Alternate in the Negotiated Rulemaking Process representing the Non-Resident Homeowners and Civic and Homeowner Associations. My neighborhood in Buxton is Flowers Ridge whose residents include commercial fishermen, small business owners, windsurfing instructors, contractors, citizens employed by local utility companies, retired second homeowners and non-resident homeowners still in the work force. I am active in the Flowers Ridge Home Owners' Association.

My educational background includes a Master of Arts from Stetson University in Deland, Florida, and post-graduate work in historic preservation at Wake Forest University in Winston-Salem, North Carolina, and post-graduate work in landscape architecture at the College of Design at North Carolina State University.

I am a real estate broker specializing in historic properties and conservation land and I work with a small boutique firm, North Carolina Estates, Inc., in Chapel Hill, North Carolina. In addition to my work as a real estate broker, I am Design Editor for a regional magazine, ***METRO Magazine: From the Triangle to the Coast***. I was previously the vice president of a Raleigh-based city and regional planning firm.

My past experience in volunteer positions includes serving as the second president of the Preservation Society of Chapel Hill; as a multiple-term board member of Preservation North

Carolina, a state-wide preservation organization headquartered in Raleigh; and most recently as a three-term board member of the Conservation Trust of North Carolina, headquartered in Raleigh. Currently my donations are to these non-profits. However, in the past, I have made contributions to the Triangle Land Conservancy, the Sierra Club, the Audubon Society and the Environmental Defense League.

My leisure activities include surf fishing, bird watching, beach walking and shell collecting.
