Mike,
Thank you for your reply. I note that you have mentioned pedestrian areas being designated and although our present document does not show any of these my email did not mention pedestrian closures, but resource closures. I will not and cannot envision any need or required year round closures other than Pea Island for resources. For the environmental side to even consider this is outrageous in my mind. From my standpoint I see that they want worse than the consent decree and it looks like NPS in DC is willing to give them much of what they want to try to avoid another law suit. If I give in to any of those resource areas they want closed year round I feel that my constituents have been let down and also my options at the end of this process will be compromised.

I do respect you and your opinions and will ask Dave and Jim to seek a replacement for me on the subcommittee if they think it is for the betterment of the process.

Frank
