BOB

I was surprised that Walker was as quiet as he was as well. Not sure what was up so I am going to call him early next week to see if there's anything up that wasn't said. I think the calls and the meeting have helped us move along. I am hoping we can do some of the same with South Point and Ocracoke folks too.

I was a bit surprised that FWS's recovery plan wasn't more prescriptive and clear about what choices people have, but I guess that means we can turn to the Park to see what they intend with their alternatives. We spoke with Mike about that the status of the NPS alternatives this afternoon and are hoping that they get them out at least one week before the November meeting, and, if we are lucky, two weeks.

I'll let you know if I learn any thing that's up in talking to Walker.

Hello Patrick,

I know we discussed some of this but I was surprised that Walker did not engage any more than he did. If I am wrong then please correct me but I thought the conference calls the three of us had on Cape Point were for this season coming up along with the final plan.

Surely he could not think that the excessive buffers and so on for non endangered birds would hold up in the plan.

Thanks for keeping us on the straight and narrow,

Bob Eakes
