Robert, in view of the the lack of progress displayed at all of our meetings since last spring, as well as the recent pressure for televised meetings, I suspect that another subcommittee meeting will be a waste of time. I now favor wrapping up the whole process at quickly as possible, consistent with trying to foster good, amicable personal relationships among members despite differing points of view on ORV issues. Nevertheless, if you truly believe that another subcommittee meeting might serve some useful purpose, I will arrange my schedule so as to be able to attend on whatever day is selected. My strong preference is for November 4 in Manteo or KDH.

All,

Here are the action items from the meeting yesterday. Let me know if I missed anything or if anything is incorrectly stated.

- Subgroups will provide comments on maps to Cyndy. Mark comments on the map and fax to Cyndy. [Please let Robert know when you have sent your comments. Although we did not discuss a deadline we need the comments as soon as possible to prepare a revised version for the next meeting.]
- Env-Ped subgroup will provide comments on the Access subgroup proposals for interdunal roads and the area from the Northern Boundary of Buxton to the Groin.
- NPS will determine the location of Ramp 49 — at the Frisco line or the distance east of the line.
- Both subgroups will consider making recommendations for signs, ramp numbers, matching beach miles with Rt. 12 mileposts.
- NPS will prepare a draft approach for the periodic review.
- Next meeting (location TBD with participation by phone for those who cannot attend in-person)
- Friday October 31st or Tuesday November 4th. [Note: Tuesday Nov 4 works better for me, and Oct 31 may present travel complications.]

Robert
