ALL

See below. Given many other emails, this is arising as another issue that may slow the NR subcommittee by focusing on the task before them. Not sure how and who should respond. Perhaps we need a quick update call this week, despite crazy schedules for all?

Subject: Information Request

Dear Mr. Patrick Field,

I am very concerned by the answer you provided when I asked you if the USF&W Turtle expert was given the committee designed information request document. I suspect that the failure of either RPS and/or USF&W to give the document to the expert in time for the information requested by the committee to be included in the presentation must violate some rule or even law under either FACA or the Negotiated Rulemaking Act. I would like to speak with an appropriate person outside NPS or USF&W regarding this subject. Please provide contact info for an attorney or appropriate person in the Office of Environmental Conflict Resolution or some other administrative office involved with this process that I may ask some legal questions.

In a related subject, I wish to request that the original committee document be forwarded to another Turtle Expert and a presentation based on the committee document be scheduled for one of the upcoming meetings.

Thank You
Patrick Paquette
