Mike,

1) We agree it's better to dive into the geographic area groups and we'll make the change. The primary purpose was to prepare the groups for the area discussions in the afternoon.

2) We also agree with pushing for tangible results. The SM1-SM2 topic is on the list to begin the discussion for the Committee to be able to fill in the Resource Protection Buffers section of the Management Activities Matrix for the consensus alternative. We want to explore if they agree conceptually with the ideas, not the details.

3) We changed the meeting #.

Robert,

In general, it looks okay to me. I have clarification questions about several items, just to be sure I understand the intent and objective.

1) Day 1, 10:30 - 12:00 subcommittee discussions (3 specific subcommittees): After our wide ranging discussion yesterday, I've lost track of what the purpose is for these particular subcommittee meetings. I recall settling on the idea of talking about Routes & Areas and Natural Resources in three groups based on geography, not by subcommittee, so I'm not sure what purpose is served by having the subcommittees meet before the geographic group discussions. Does it help the subcommittees further their proposals for the geographic groups to consider, or in some way does it prepare the respective subcommittee members to explain their proposals and discussion-to-date to the geographic groups in the afternoon? Or some combination of both? If the purpose is clear, then I am okay with it. At moment, the purpose isn't clear to me, so I wonder why we wouldn't just move to the geographic group discussions at 10:30 a.m. and skip the subcommittee piece.

2) Day 1, 1:30 p.m. under Discussion Topics, Natural Resources topics. It is not clear to me the purpose of the topic on "Species Management for the

0076058

Committee's consensus alternative." Are we asking the groups to recommend whether SM1 or SM2 is applied to respective beach segments? Or is it something else? I am not opposed to discussion on the topic, particularly if it helps people better understand NPS's approach, but just want to be sure the purpose is well defined and expectations are clear. It is potentially an open-ended topic that has not been explored in detail in the Natural Resources subcommittee. If we try to get into it in much depth in the bigger geographic groupings, we could easily spend hours and hours discussing specific details in the SM1 and SM2 measures (who likes or dislikes what buffer distances, etc.) without moving us forward to a tangible result.

Thanks,

Mike Murray

CAHA-Agenda Planning

All,

Attached is the initial version of the December agenda based on our call yesterday. Let us know if it looks ok or if you have comments or suggestions. We are talking about the contingency plan if we decide to pull vehicles and permits, passes, fees on Monday after Carla and Destry talk.
